

GoodRx

Prescription Drug Price Comparison Tool

Stop paying too much for your prescriptions!

Good Rx, provided by Conner Strong & Buckelew, allows you to simply and easily search for retail pharmacies that offer the lowest price for specific medications.

The cost for the same medications – even when using a network retail pharmacy – vary drastically from one drug store to the next. And while prescription drug plan copays may be the same no matter which pharmacy you go to, the retail cost to your employer may be greatly reduced when you get your medications from a pharmacy that charges a lower discounted price.

Use Good Rx to compare drug prices at local and mail-order pharmacies and discover free coupons and savings tips. Find huge savings on drugs not covered by your insurance plan - you may even find savings versus your typical co-payment!

Lower costs to your employer can also help keep your benefits costs down in the long run.

You can find the lowest price on prescriptions right from your phone or tablet.

Our free, easy-to-use mobile apps feature:

- Instant access to the lowest prices for prescription drugs at more than 75,000 pharmacies
- Coupons and savings tips that can cut your prescription costs by 50% or more
- Side effects, pharmacy hours and locations, pill images, and much more!
